

Understanding Technologies Impact on Careers

TOPIC: CAREER AWARENESS

GRADES 6-8, 9-12

LESSON DURATION: N/A

Learning Outcomes:

- Students will develop an awareness of their strengths and talents in order to identify potential careers.
 - Students will analyze the impact technology has had on their chosen career field.
-

Materials:

- Access to a Job Skills assessment (vary by school corporation)
 - Internet Access
 - [Student guide](#)
 - Access to community members (optional)
-

Activities:

1. Students should have already taken a skill assessment survey or job interest survey prior to the activity.
2. Allow students time to work on the student guide. Be available to answer questions and help guide students.
3. After this activity, the teacher might consider an enrichment activity. Students could interview a person who does the job. Students should develop the interview questions but should focus on changes that the person has seen, how they have been impacted by technology, what they have done to adjust, what they believe the job will be like in the future, etc. The teacher could help arrange the interviewees and invite them to come into the classroom to meet one on one with the student.
